

I would like to urge you to NOT overturn the Indiana Telephone Privacy Act. Prior to its' implementation, I would receive an average of 1 interrupting phone call an evening! I consider that an invasion of my right to privacy and the happiness that our constitution so eloquently refers to! I am NOT happy when I must interrupt whatever I am doing to answer the phone for something that

I never want and end the interruption with the reply of - I am not interested!-only to have them try again in a short span of time. Please, I implore you - do not rescind this!

Thank you for your time and for listening(reading!).

Sincerely,

Janet Valpatic
